

# PLANET SCUBA

## *DIVE INTO OUR UNIVERSE*

**We invite you to join us on this super 'big critter / big fun ' adventure!**

### **SEA OF CORTEZ: LIVE-ON-BOARD**

Dates: October 17-24th (Douglas County Schools Fall Break)

#### Trip profile: [SEA OF CORTEZ](#)

The Sea of Cortez is home to many endemic species, such as the Cortez angelfish and Cortez damselfish, found nowhere else in the world. We also encounter whale sharks, hammerheads, orcas, whales and dolphins. We have been diving the amazing Sea of Cortez since 1984. The Sea of Cortez is located between the Baja Peninsula and the mainland of Mexico. It is one of the youngest and most fertile seas on earth, containing over 850 species of reef fish. The beautiful, tranquil sea has much to offer – large schools of tropicals, jacks, tuna, dorado, wahoo, marlin, stingrays, turtles, playful resident California sea lions, several types of moray eels, lobster, octopus, frogfish, sharks, mantas, and the famous flying mobulas of the Sea of Cortez. This area is usually calm and the distance between dive destinations is not far. Although there are some advanced dives most of the diving is moderate. This is a great trip for those looking for a live-aboard experience in calm water with both big and small marine animal encounters. There is something special about the Baja peninsula and diving the Sea of Cortez – a living desert wilderness spilling into the spectacular Sea of Cortez.

#### Ship Details: [M.V. NARVAL](#)
