## **Belize-Turneffe Island Resort**

Do your open water certification dives

and/or

Advanced Open Water Program

### **Dates:**

17 October—24 October : DOUGLAS COUNTY FALL SCHOOL BREAK

### **Dive site profile:**

As the largest coral atoll in the Caribbean, Turneffe offers varied underwater dive terrain including spur and groove formations, sandy ledges and sheer walls providing spectacular dive sites to suit every level of diver. Turneffe's southern point offers a variety of popular dive sites featured in many of the Belize dive guides. The Elbow is probably the best known site here with the ocean current sweeping over the deep reef to attract schools of pelagic fish. As you travel up the Southwest or Southeast sides of the atoll, dive sites vary from patch reef nurseries with dramatic coral formations to steep drop-offs.

While diving throughout the Turneffe Atoll, you will see a variety of hard and soft corals as well as all of the Caribbean tropicals, eagle rays, sharks, turtles, dolphins, moray eels, and occasionally a whale shark in addition to large schools of permit, horse eye jacks and dog snapper. On the North side, the reef is often affected by trade wind swells but on the calmer days we can explore these mostly untouched dive sites.

Schools of mutton snapper, Atlantic spadefish and permit hover 80 feet above the sea floor and blue runners make close passes, apparently attracted by the bubbles of the strange "Neoprene-clad creatures".

### **Hotel:**

Turneffe Island Resort :
