

PLANET SCUBA

DIVE INTO OUR UNIVERSE

We invite you to join us on one of our exciting group, instructor escorted trips!

Caribbean: Spring Break "09"

65 FOOT LIVE-ON-BOARD PRIVATE CHARTER
FEATURING: DIGITAL PHOTOGRAPHY WORKSHOP & REEF
ECOLOGY PROGRAM

Dates: [SPRING BREAK 2008 : 3rd ANNUAL TRIP](#)

21 March 2009 6 nights

[Dive site profile:](#)

Dive the reefs, wrecks, walls, drifts and the blue hole and even a thrilling shark dive! The Exuma Sound is an abyss that runs the length of the eastern Exumas. The coral cover and underwater geography is phenomenal, with swim-throughs, tongue and groove coral heads, and prolific sea life. You'll see large fish and large quantities of fish. Pelagic sightings are a daily occurrence. Sea turtles, eagle rays and sharks abound in this area of the Bahamas. You can also snorkel most of the sites in the Exumas and enjoy the gin clear waters of the central Caribbean.

[DIVE SHIP PROFILE:](#)

Cat Ppalu Cruises offers a leisurely liveaboard adventure in paradise. Each week we set sail from Nassau to the Exuma Islands on the 65' sailing catamaran, Cat Ppalu. This is the ultimate escape aboard your own private yacht. See www.catppalu.com for more details. We will limit this group to 12 guests and welcome families as well as singles.

[SPECIAL NOTES:](#)

No crowds, no set itineraries, nothing to do but sit back, relax and choose from an incredible variety of activities: sailing, cruising, snorkeling, scuba diving, kayaking, bird watching and of course, island exploring. Consider the Cat Ppalu a floating bed and breakfast; your private floating hotel, with captain and crew at your service. Our crew handle all of the details. With an open bar and all beverages, meals, water sports and diving included in the price, it's comparable to a luxury cruise or resort vacation, only the service is much more personal on our live aboard sailboat, the Cat Ppalu.

Kayak the cays and inlets, explore the many uninhabited beaches, and even big game fish from our sail boat, the Cat Ppalu!

Escorted by Planet Scuba, we will feature reef ecology talks, marine biology programs and a digital photography workshop.
