### **Dive site profile:**

Rainbow Reef is famous for its multi-hued soft coral. The daily tidal currents in SomoSomo Strait produce a constant flow of nutrients that provides ideal conditions for soft coral growth, as well as sustains an incredible diversity and density of tropical fish life. The fringing reef area provides opportunities to experience larger fish and drop-offs. All dives at Aqua-Trek Taveuni are at the world famous Rainbow Reef. This area includes patch reefs in SomoSomo Strait and the fringing reef on the southeast corner of Vanua Levu. The distance to the majority of sites from the resort ranges from 10 to 30 minutes by dive boat. On the patch reefs diving is fairly shallow (30 to 70 feet, at the fringing reef section diving is wall diving with deeper profiles (50 to 100 feet).
